FOR IMMEDIATE RELEASE

Jason S. Knutson Receives ASQ-Certified Calibration Technician Recognition

Milwaukee, WI, June 13, 2007 — The Certification Board of the American Society for Quality is pleased to announce that Jason S. Knutson has completed the requirements to be named an ASQ-Certified Calibration Technician (ASQ CCT). As such, Jason S. Knutson has reached a significant level of professional recognition, indicating a proficiency in and a comprehension of calibration tools and techniques that support a variety of quality-related systems and processes. Individuals who earn this certification are allowed to use "ASQ CCT" on their business cards and professional correspondence.

"ASQ provides certification as a way to provide formal recognition to professionals who have demonstrated an understanding of, and a commitment to, quality techniques and practices in their job and career," explains Ronald D. Atkinson, President, American Society for Quality. "This is a great accomplishment and, although not a formal registration or licensure, bestows a high level of peer recognition as well."

A Certified Calibration Technician (CCT) is a professional who understands the principles and applications of metrology, calibration, and measurement systems. In addition, a successful candidate must understand the principles of uncertainty as well as basic quality systems and the application of quality tools and standards in a calibration environment. In order to sit for a CCT examination, a candidate must have at least five years of training and on-the-job experience in one or more areas of the body of knowledge.

Since 1968, when the first ASQ certification was given, more than 100,000 individuals have taken the path to reaching their goal of becoming ASQ-Certified in their field or profession, including many of who have attained more than one certification. To learn more about ASQ's Certified Calibration Technician program, visit <http://www.asq.org/certification/calibration-technician/>.

The American Society for Quality (www.asq.org) is the world's leading authority on quality. With more than 100,000 individual and organizational members, the professional association advances learning, quality improvement, and knowledge exchange to improve business results, and to create better workplaces and communities worldwide. As champion of the quality movement, ASQ offers technologies, concepts, tools, and training to quality professionals, quality practitioners, and everyday consumers, encouraging all to Make Good Great. ASQ has been the sole administrator of the prestigious Malcolm Baldrige National Quality Award since 1991. Headquartered in Milwaukee, Wis., the 60-year-old organization is a founding partner of the American Customer Satisfaction Index (ACSI), a prominent quarterly economic indicator.
